Art Unit: 1772

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 00/06379. See page 2, lines 18-26.

3. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pawlicki. See column 3, line 41 through column 4, line 9.

4. Claims 1-7 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Davison. See column 4, lines 52-75.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pawlicki. The reference discloses the invention substantially as claimed; see column 3, line 41 through column 4, line 9. However it does not disclose that the mats are non-woven mats. In view of the fact that the drawings in the reference appear to show non-woven mats and that non-woven mats are well known in the art, it would have been obvious to one of ordinary skill in the art to use non-woven glass mats as the glass mats in the article of the reference.

Art Unit: 1772

7. Claims 5, 8-10 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/06379. The reference discloses the invention substantially as claimed; see page 2, lines 18-26. However it does not disclose additional layers of inserts or intermediate layers. It would have been obvious to one of ordinary skill in the art to add additional layers of inserts and non-woven layers to the article of the reference to provide additional insulating properties and desired structural properties for a particular end use.
